⁼ Not Applicable.

Includes monthly adjustments for hydrogen and other hydrocarbon production.

Includes those domestic and Customs-cleared foreign crude oil stocks held at refineries and tank farms or in transit thereto, and in pipelines.

Includes non-U.S. stocks held under foreign or commercial storage agreements.

Excludes stocks located in the "Northeast Heating Oil Reserve", "Northeast Regional Refined Petroleum Product Reserve", and "State of New York's Strategic Fuels Reserve Program." For details see Appendix

⁴ Includes weekly data for NGPLs and LRGs (except propane/propylene), kerosene, and asphalt and road oil; and estimated stocks of minor products based on monthly data

⁵ Domestic crude oil production includes lease condensate and is estimated using a combination of short-term forecasts for the lower 48 states and the latest available production estimates from Alaska. Weekly crude oil production estimates are rounded to the nearest 100,000 b/d at the U.S. and lower 48 state levels. For more details see Appendix B, under "Data Obtained Through Models."

6 Formerly known as I paccounted for Crude Oil this is a helposities they see Classon for the latest available production estimates from Alaska. Weekly crude Oil production are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states and the latest available production estimates from Alaska. Weekly crude Oil production includes lease condensate and is estimated using a combination of short-term forecasts for the lower 48 states and the latest available production estimates from Alaska. Weekly crude Oil production includes lease condensate and is estimated using a combination of short-term forecasts for the lower 48 states and the latest available production estimates from Alaska. Weekly crude Oil production includes lease condensate and is estimated using a combination of short-term forecasts for the lower 48 states and the latest available production estimates from Alaska. Weekly crude Oil production estimates are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded to the nearest 100,000 b/d at the U.S. and lower 48 states are rounded

Formerly known as Unaccounted-for Crude Oil, this is a balancing item. See Glossary for further explanation.

Formerly known as Natural Gas Liquids Production, prior to June 4, 2010, this included adjustments for fuel ethanol and motor gasoline blending components.

Includes denaturants (e.g. Pentanes Plus), other oxygenates (e.g. ETBE and MTBE), and other renewables (e.g. biodiesel). Includes finished petroleum products, unfinished oils, gasoline blending components, fuel ethanol, and NGPLs and LRGs.

Includes an estimate of minor product stock change based on monthly data.

Total Product Súpplied = Crude Oil Input to Refineries (line 14) + Other Supply Production (line 15) + Net Product Imports (line 21) – Stock Change (line 24) + Adjustment (line 25).

See Table 2, footnote #3.

See Table 2, IoDinote #3.

14 Other Oil Product Supplied = Total Product Supplied (line 26) less the product supplied of Finished Motor Gasoline (line 27), Kerosene-Type Jet Fuel (line 28), Distillate Fuel Oil (line 29), Residual Fuel Oil (line 30), and Propane/Propylene (line 31).

Notes: Some data estimated (see Sources for clarification). Data may not add to total due to independent rounding. Differences and percent changes are calculated using unrounded numbers. Source: See page 29.
